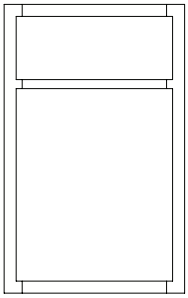
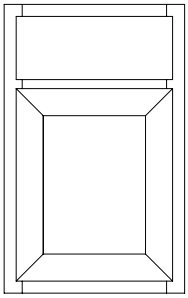
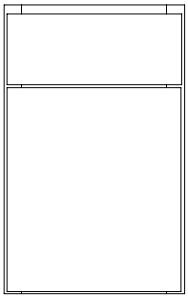
Overlay / Door Type Information



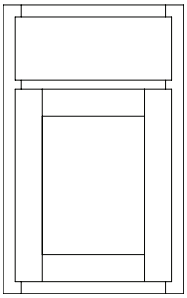
Standard Overlay
Standard Overlay door styles have a 3/4" reveal left and right and 15/16" top and bottom. 3/4" in between the doors and drawer fronts so no hardware pulls are required.



Mitered
A joint made by beveling each of two surfaces to be joined, usually at a 45° angle, to form a corner, usually a 90° angle.



Full Overlay
Full Overlay door styles offer a minimal gap between the door and drawer front, as well as cover the face frame producing a 3/16" reveal. Door and drawer hardware pulls are required.



Mortise & Tenon
Mortise & Tenon joint is made by inserting mortise on one piece into tenon in the other.

Wood Species

Grain is the texture seen in cut wood. Door panel grain runs vertical, while drawer front grain runs horizontal.

Beech is a heavy, pale-colored medium to hard wood. It has a fine grain and modular rays, similar in appearance to maple or birch woods. Beech wood has a high shock resistance and takes stains well.

Cherry is a fine textured, strong and fairly durable wood and is well known for becoming darker and richer with age. While fairly pale when freshly cut, the end result is a favored reddish brown with a golden luster hue.

Knotty Alder features a color range of light brown with reddish or peach hues. With soft, straight grain and even texture, it's characteristic also includes small and large split knots and open knots that vary in size, shape, and color.

Maple is a close grained wood that is generally straight, but may be wavy in some instances. Its color ranges from nearly white, to an off-white cream color, sometimes with a reddish or golden hue.

Oak features medium-to-large pores and a fairly coarse grain. Oak wood has a light to medium reddish-brown color that sometimes is streaked with mineral deposits and may vary from a close knot grain to sweeping arch pattern.

HDF consist of a hard wood or wood-type center that offers a smooth and uniform surface ideal for solid color finishing. The advantage of using HDF vs. wood in the core points to the moisture-resistant nature of fiberboard.

Care, Cleaning and Misc

Once your new kitchen has been installed and touched up, cleaning is the most important item that must be done. During normal installation, sawdust and other materials may be in the cabinet. To properly care for your cabinetry, remove dust from cabinets frequently with a soft lint-free cloth. You may slightly dampen your cloth with water or spray-type dust remover. If you spill anything on your cabinets, clean immediately. Use a clean cloth and mild soap if necessary. Wipe dry with a clean, soft cloth.

To keep your cabinets beautiful, avoid spray-type polishes containing petroleum solvents. Wood cabinetry finishes may be cleaned and protected using any commercial cleaning polish. Use any polishes that are formulated without wax, petroleum solvents or silicone. The extended use of wax polishes can result in a wax film build-up. The use of silicone polishes can harm the cabinet finish. Do not use a dish cloth to wipe your cabinet's exterior, as it may contain remnants of grease or detergent.

For everyday care, it is important to wipe up spills and water marks as they occur. Give special attention to areas around the sink and dishwasher.

Use a quality furniture polish found at your local supermarket.

Caring for the natural beauty of your Nations Cabinetry means proper maintenance. Here is how to prevent damages:

1. Excess water, when left unattended, can cause white spots and haziness to the finish and even damage the wood itself. Always remove excess liquid promptly, especially in moisture-prone areas, such as sink, range, dishwasher, and baseboard areas.

2. Direct sunlight can cause exposed areas to lighten or darken over time. When possible, keep cabinets out of direct sunlight or draw curtains during the sunniest part of the day. Be especially careful with cherry and maple cabinets.

3. Smoke and grease can form a hard film over time, dulling the finish. Routine cleaning can prevent long term damage.

CAUTION: The use of self-cleaning appliances can generate intense heat during the cleaning cycle. The integrity of the appliance seal or appliance door gaskets may be compromised with age, or improper installation, etc. We recommend the removal of the doors and pulling out the drawer on the cabinet adjacent to or directly above the appliance during a cleaning cycle.

SURFACE DAMAGE
As careful as you are, there may still be times when your new cabinets will get nicks and scratches. Your dealer has cabinet touch-up kits. It is a smart idea to purchase one of these kits to make small repairs as needed.

SCRATCHES & SCRAPES
Most cabinet scratches can be touched up using a matching touch-up marker that is available from your dealer.

NICKS OR GOUGES
Deeper damage requires using a fill stick. This will make the necessary repairs.

NOTE: Scratches across the grain are very difficult to repair and damage that is more substantial should be repaired by a professional finisher to prevent possible finish or surface damage.

Care, Cleaning and Misc

Wood is hygroscopic - meaning, when exposed to air, wood will lose or gain moisture until it is in equilibrium with the humidity and temperature of its environment. Tidwell Cabinetry closely monitors the moisture content of its product up to the point it is placed on the truck for delivery. Even then, protective coatings cannot prevent wood from gaining or losing moisture; they merely slow the process.

Most of the shrinkage and expansion problems with wood cabinetry involve job sites or storage moisture conditions. These conditions cannot be controlled by cabinet manufacturers or in many instances by subcontractors responsible for installing the cabinetry, unless interior humidity is maintained at proper levels.

For wood cabinetry professionals, it is important to inform users about the normal and expected behavior of wood in relation to moisture and the environment. Most wood cabinetry will contract during periods of low humidity, which is usually during the heating season, or expand during periods of high humidity. To help minimize these effects, it is important that users balance the environment of the building through temperature and humidity control.

Fortunately, wood cabinetry performs at its best both during and after installation, when the relative humidity range of 30 to 50 percent and temperature range of 60 to 80 degrees, the range most people find comfortable.

Installation Do's and Don'ts

It is recommended that you use a professional installer to install your cabinetry.

It is best to begin the installation with the wall cabinets, this way there won't be any base cabinets to work around.

Secure the cabinet to the studs using at least two screws per stud. Evenly space the screws between the top and bottom of the cabinet.

It is always best to verify there is at least one stud behind each cabinet in the middle of a run, and at least two studs behind each cabinet at the end of a run.

Floating cabinetry and floating shelves require additional support at time of installation.

Install only one cabinet at a time, always making sure it is level and plumb.

Wall cabinetry that is above standard depth should be installed between cabinets or have extra support against the wall.

Drill not only into the wall but through attaching face frame to ensure cabinets are secure. When an adjacent cabinet is attached to the previous cabinet, be sure to fully tighten the previous wall cabinet wall screws.

Never use sheet rock/flat head screws. Only use #10 x 2 1/2" through cabinets into walls and recommended #8 x 2 1/2" Phillips pan or trim head screws when joining cabinets.

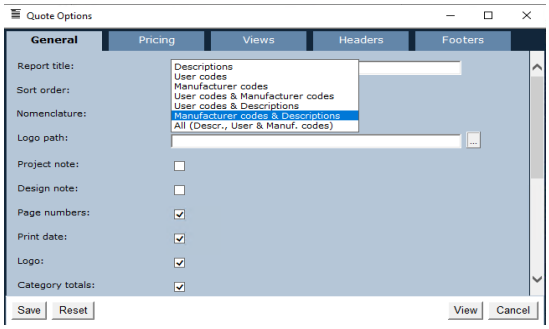
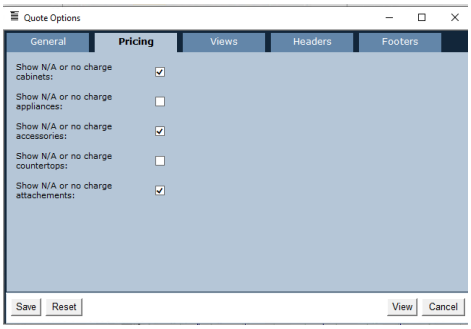
2020 Importing tips

For uploading Quotes using the 2020 design program, below are some instructions, upgrades and enhancements that have been made to make the process smoother.

1. When exporting the data out of 2020, set the Nomenclature to Manufacturers Codes & Descriptions as shown below. This allows all the correct hinging and options to import without having to re-select them.
2. The Pricing tab is very important. If the last check box is left unchecked, it may not show or bring over any options.

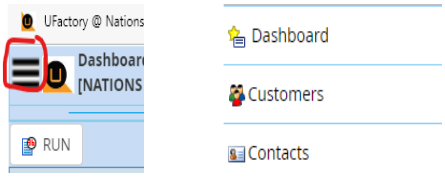


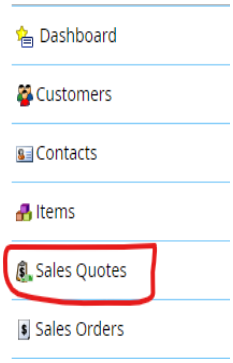


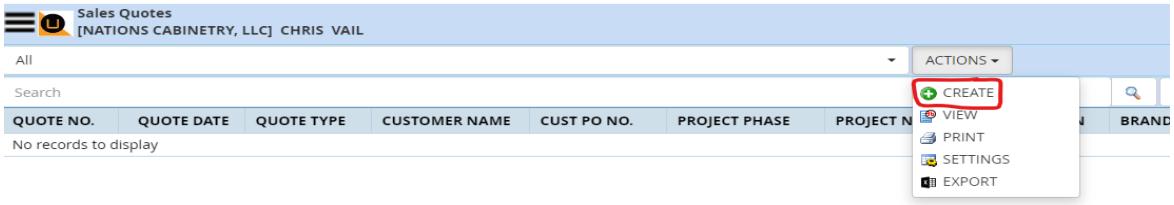
3. Once the quote is displayed, create the txt file and save it for importing into Ufactory. Example: Design1.txt.

4. Open a Browser and go to https://ufactory.nationscabinetry.com/, enter your credentials and go to Sales Quotes as shown below.

5. Click the hamburger icon and this will bring up a menu of items, click on Sales Quotes as shown then Click the ACTIONS button, then click CREATE, also shown below.







Continue to next page.....

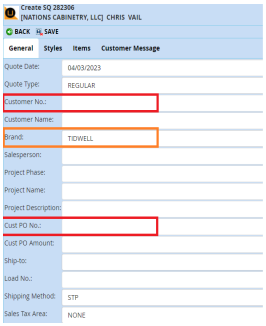
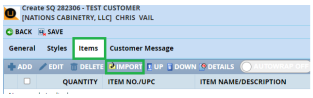
Tidwell CABINETRY

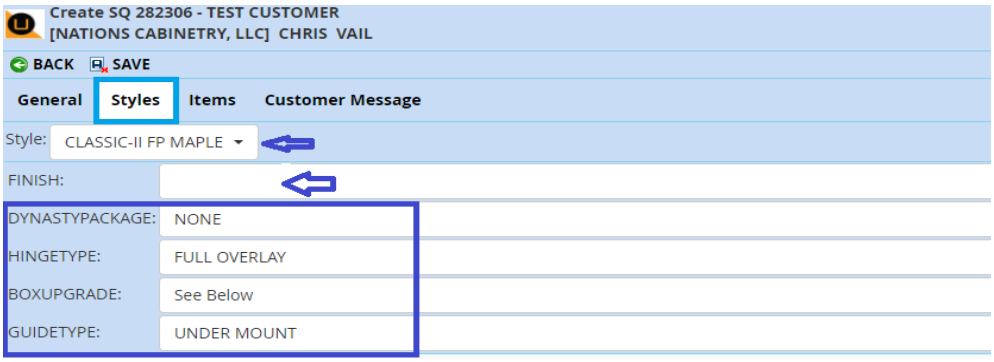
2020 Importing tips (Continued)

6. When Create is selected, the system will generate a new sales quote #. On the General Tab enter the required information shown below. When completed go to the Items tab, click the Import button, select the file that is to be imported. Click on the file to import, this will take a few seconds.





7. Go to the Styles tab and click to begin selecting the style, finish and any other global options. Depending on the amount of line items this time can take several minutes.



Important note, if for any reason an import is re-done, on the existing quote, the style and finish are wiped out, which means if Style and Finish are not selected again after any import, none of the items will price and this will cause an issue when attempting to print the Quote.

If you have any issues with Ufactory, our 2020 catalog or an issue related with importing to Ufactory, please email us for help at info@nationscabinetry.com and someone will follow up as soon as possible. As always, we appreciate your feedback if bugs are found.

Acct #: _____ Date: _____

Thank you for choosing Tidwell Cabinetry Custom Color Program. Our goal is to provide you with the best service and manage your custom color order efficiently and effectively. Please take a few moments to review the information below.

- Sample cost is $164.00 Net per Shaker sample door. If custom color is approved, cost of sample is credited to cabinetry order.
- Custom Color Program sample is done in Shaker door style.
- Color code and name must be currently offered from any paint manufacturer.
- Sample is good for 1 year from production.
- After 1 year from production date, a sample door or item must be sent in by the customer to check for color drift and reproduce the best replacement product.
- Once the sample is approved, material will be produced based off order volume. Materials being produced follow the same process of sample materials with lead times depending on the ability to produce in plant, number of colors on order and volume of orders.
- The order will not be processed until the color sample is approved and an approval signature is submitted to Tidwell Cabinetry.

Per Drawing Process

Tidwell CABINETRY

To better serve our customer needs, Tidwell Cabinetry offers semi-custom cabinetry known as a "Per Drawing".

Anytime a specialty cabinet is requested, we ask that you follow these few simple guidelines to help expedite the process and ensure that it is done correctly and in a timely manner.

PER DRAWING GUIDELINES

PER DRAWING REQUEST: Complete per drawing request form and submit it to your customer service representative. Ensure that the form is filled out properly, as any missing information will delay the process.

QUOTE: Price is quoted and returned to you via email . Once this is done, your request is on hold until a preliminary drawing is requested.

PRELIMINARY DRAWING: Once requested, a preliminary drawing is done to confirm cabinet design, style, color, and construction. If corrections are necessary, please mark and return the drawing to your customer service representative.

APPROVAL: To approve, sign and date the preliminary drawing and return it to your customer service representative. Please note, shop drawings will not be created until the preliminary drawing is signed and returned.

PRODUCTION: Once your approval is received, a drawing number will be assigned and we can begin the shop drawings and specifications for our system.

Since a "Per Drawing" cabinet is not run through our standard manufacturing process, we require at least 2 business days from the time the original request is sent in before item can be placed into production.

Also, Per Drawings are specialty-built items and are not available in Rush.

NOTES:

- Left or Right designates blind side
- Door is hinged on blind side
- A pull is required on standard and full overlay styles
- The RBB will need to be pulled away from the adjoining wall to clear adjoining cabinet, knobs and/or pulls used. The RBB will also need to be pulled if an appliance on the adjacent wall projects more than 24" deep and is within 24" of the RBB. The "maximum" pull dimensions indicate the furthest distance the RBB can be pulled away from the adjacent wall
- **Filler not included, must order separately**

Cabinet Replacement Shelves

AVAILABLE OPTIONS ARE SHADED															
5PDF	AF	APC	CFG	CW	F4S	FE	FTK	MD/MD9	MI	NTK	PLYE	RPDF	SCD	SCH	SLB	XX

NOTES:

- Every Cabinet that Tidwell Cabinetry offers that has shelves has a SHELF-ONLY option. This does not apply to items that have fixed shelves.
- The process for ordering these shelves is to order the cabinet that the shelf is needed for and go to the options selection and select SHELF-ONLY. This will provide 1 shelf accessory item that will fit the item perfectly.
- As with the cabinet, all options that will directly affect the shelf are available as well. IE, W3030 that is 15" deep and has Matching Interior. Select those options along with the SHELF-ONLY option and the shelf will be deeper and with matching interior.
- When ordering shelf options for our Base line of cabinetry, please make sure that you use the FAS, or Dynasty Package Option if you want a Full Adjustable shelf.
- When ordering a shelf for an item that doesn't come with a shelf standard, you must select Full Adjustable Shelf (FAS) and the SHELF-ONLY option.
- The SHELF-ONLY option is priced dimensionally using the shelf size and calculating the Square feet of the shelf itself. If the item doesn't pull a shelf, the system will not know how to price the item.
- Pricing is shown below:

Shelf Type	Price per square foot
Standard Interior	11
All Plywood Construction	15
Matching Interior	15

Tidwell CABINETRY

Tidwell Cabinetry products carry a Limited Lifetime Warranty against defective material and workmanship from date of delivery. Under this Limited Lifetime Warranty, a primary or secondary home does not include rental property. This Limited Lifetime Warranty does not apply to landlords, leasing companies or other commercial purchasers.

Wood is a product of nature, each tree varies in grain, pattern, density and color. Nature's impact determines the wood's distinctive character. Color match and grain patterns will vary because of material characteristics and are not considered defects by Tidwell Cabinetry. Exposure to sunlight, smoke and chemicals may cause some materials to fade or vary from their original color over time. Extreme temperatures can cause most solid wood items, like drawers and doors to warp and shrink.

Limits of Warranty:

It is recommended that you use a professional installer to install your cabinetry.

This warranty does not cover misuse, abuse, overloading, improper storage or installation of any kind.

Floating cabinetry, floating shelves or wall cabinetry that is above standard depth, should be installed between cabinets and/or require additional support at time of installation.

Wall cabinetry that is above standard depth should be installed between cabinets, or have extra support against wall.

During the warranty period, all defective materials will be replaced by Tidwell Cabinetry at no charge to the consumer. Warranty does not include any other products used in conjunction with the cabinets; including but not limited to: countertops, all appliances, backsplashes, plumbing, fixtures, and all forms of labor including cost of removal, transportation and installation.

All warranty is limited strictly to the item or the part of the item is purchased only.

Warranty does not include damages caused by any other product or natural causes of any form, such as a water damage or a flood. This also includes, all-natural causes such as earthquake, tornado, flood, etc that cause damages.

Any form of misuse, accident, alteration, negligent use is not covered by this warranty.

Cosmetic defects including but not limited to, scratches, dents, bad coloring, and all things that can be spotted will the eye easily are considered cosmetic and should be reported before installation. Scratches and dents can be caused during or after installation and are not covered by this warranty.

Photography is for illustration purposes only. Actual colors may vary from those shown in photographs due to the printing process.
